WORK EXPERIENCE

Ejen2u International Sdn. Bhd | Selangor, Malaysia (Remote) June 2022 – Present

Full-stack Developer | October 2023 – Present

- Leverage Model-View-Controller (MVC) architecture to design and implement end-to-end features for SaaS applications.
- Apply advanced problem-solving skills to identify system bottlenecks and deliver efficient technical solutions.
- Collaborate across the full technology stack to improve user interface responsiveness and backend stability.
- Manage complex data flows between frontend components and server-side logic.

Back End Developer | June 2022 – September 2023

- Developed and maintained robust server-side logic using PHP and the Laravel framework.
- Ensured code reliability and software quality through automated testing using PHPUnit.
- Built and optimized structured HTML components for seamless integration with backend services.
- Focused on database management and API development to support scalable application growth.

PT. Aptana Citra Solusindo | Makassar, Indonesia (On-site) October 2021 – June 2022

Full-stack Developer

- Developed web-based application products for corporate clients.
- Maintained and optimized existing systems to improve performance and user experience.
